

OVEN'LY WEBSITE

Audit

HOMEPAGE FIX

- CTA - we can change the CTA to “Order now” & “Explore our menu” because “Order now and call us feels the same.
- The color palette could be used more effectively.
- Hero section: The hero section isn’t stopping scroll or making people crave the product.
- Reworking the Hero Copy to something smaller and more personal
- Fix: Replace it with a full-screen, mouth-watering close-up of your best product.
 - Examples:
 - Ganache dripping down a cake
 - Perfect macaron tower
 - Sliced brownie with a gooey centre

We can turn this into a clickable carousel that takes the user directly to the ORDER NOW page

HOMEPAGE FIX

- "Order now and call us, delivers the same kind of message, but in a different way
 - Suggested CTA: "Order Now" / "See the Menu"
- Social Proof - No reviews, no customer love, no credibility being shown
 - Fix: add Google reviews/Instagram reviews just before the footer
- Founder Note - The founder note can be shorter, and add another section for best sellers

MENU FIX

- The menu has no photos (the biggest problem)
 - fix: Add photos for every item.
- Descriptions aren't selling anything
 - Fix: Write 1–2 lines describing flavour, texture, and occasion.
- Finding items on the phone feels like a chore
 - Fix: Add sticky category tabs at the top.

Example tabs:

Cakes | Cupcakes | Macarons | Brownies | Tubs | Jars

ACROSS THE WHOLE SITE

- Fonts don't feel premium yet
- Colour palette doesn't feel like Oven'ly
- Navigation isn't built for thumb-first mobile use
- No occasion-based browsing
- Site likely loads slowly on Indian networks
